

Development of digital module-based self-oriented teaching and learning arrangements for disadvantaged target groups - ModuSOL"

ModuSOL

Meeting in Schwerin, Germany

As part of the Erasmus + project ModuSOL, the second transnational meeting took place in April 2018 in Schwerin.

The project partners from Scotland, Spain, Czech Republic and Berlin worked together with RegioVision to develop further project content. The digitization of education is being further developed by the partnership-based cooperation in the project.

The meeting participants did a common exploration of the old town of Schwerin.

Learning Activities

An important project requirement is the development of learning activities for trainers which will take place in the partner countries of Spain and Czech Republic in the second half of 2018.

The recruited trainers and teachers of the project partners will first meet for digital learning with the partner Decroly S.L. in Santander in October 2018 and then for further advanced learning with the partner INSTITUTE INPRO in Prague in December 2018.

3rd Meeting in Dundee in November 2018

The 3rd transnational project meeting takes place in Dundee with the Scottish partner Dundee & Angus College just after the first learning activity.

The aim of the meeting is the presentation and detailed planning of the project products, the evaluation of the first learning activity and the communicating of innovations in the digital domain at the upcoming dissemination events in the early summer of 2019.
